Advertisements in the Proceedings of the 12th HVOF Colloquium 2023

OFFER FOR SPEAKERS AND EXHIBITORS

As a speaker or exhibitor at the 12th HVOF Colloquium 2023, we would like to give you the opportunity to place an advertisement in the conference proceedings in addition to your paper at a special rate.

Each colloquium participant receives a copy of the proceedings. Afterwards, the proceedings can be purchased from the GTS Head Office or ordered via **ISSN Number 1612-6750** international. **For even more visibility of your advertisement**, you will also be included in the online advertiser directory on the HVOF Colloquium homepage. Furthermore, your advertisement will be published in the content preview of the proceedings, which will be freely available in the download area of the homepage. Your advertisement in the proceedings is therefore an ideal way to reach users of high velocity oxy-fuel flame spraying and other thermal spray processes as well as further thermal spray stakeholders.

Deadlines and dates

Final date for the submission of advertisements and print material: **8 September 2023**
Publication date: 26 October 2023
